

The CA-NV SWCS Chapter Presents....

No-Till Mini-Series

Part IV- No-Till: The Quiet Revolution

April 22, 2022

Please follow along on our journey of highlighting this impactful collection of research that recognizes the landmark research and literature that has contributed to the scientific body of knowledge in No-Till.

Our fourth installment features an article published July 1, 2008 by David R. Huggins and John P. Reganold in Scientific American (Vol 299, Issue 1: 70-77, www.SciAm.com), focusing on how the age-old practice of turning the soil before planting a new crop is a leading cause of farmland degradation. Highlighting a no-till pioneer, John Aeschliman, this article also looks at the key concepts of no-till ag, hurdles to adoption, pros and cons, and more to explore.

We will be showcasing 9 of these pieces throughout the spring and summer. Pop on over to our [Social Media](#) to join the conversation.
